

PARENTS ALERT (Feb. 2025).

ESPAÑOL

ESTA INFORMACION PUEDE SER USADA PARA PROTEGER NUESTROS NIÑOS DEL DAÑO CAUSADO POR LA RADIACION MICRO-ONDAS DE TELEFONOS CELULARES, DEL WI-FI Y DE OTROS APARATOS INALAMBRICOS.

El compartir esta informacion con su familia, con pastores, y con personas con enfermedades cronicas o peligrosas: +

Puede evitar inmenso dolor y sufrimiento;

Puede salvar la vida de millones de nuestros niños;

Y puede restaurar el sistema de salud al intento original.

En el Amor en Cristo,

 3 Feb., 2025
Jesus Mendoza Tel. (956) 583-7012.

(Medicos expertos en Medicina Ambiental estan recomendando quitar los telefonos celulares e inalambricos, el Wi-Fi y otros aparatos que emiten micro-ondas de casas con niños y con mujeres embarazadas (Con mascotas), con personas de la tercera edad y con personas con enfermedades cronicas o peligrosas).

+ (Y CON SUS CONTACTOS).

PARENTS ALERT (Feb. 2025). PART ONE OF TWO.
ESPAÑOL (Pages A to 8)

Evidencia medica, cientifica y legal en los archivos the Cortes federales y estatales ha comprobado atentados fraudulentos para esconder que LA RADIACION MICRO-ONDAS de telefonos celulares, de Wi-Fi y de otros aparatos inalambricos ES RESPONSABLE por los millones de niños con daño cerebral (Autism y ADHD y otros problemas mentales), con problemas de comportamiento, con tendencias de suicidio, y con otras enfermedades fatales.

Hace mas de 13 años perdi la habilidad de andar en la calle, y la habilidad de ir a tiendas, restaurants y a otros lugares publicos debido a mi Sensibilidad a la Electricidad (EHS) y a mi Sensibilidad a Quimicos y a otros toxicos que se encuentran en el medio ambiente. (CHS) +
Ver paginas 1A - 2B.

Radiacion Electromagnetica Inalambrica, incluyendo la radiacion MICRO-ONDAS de telefonos celulares, WI-Fi etc., me causa entre otras cosas:

- 1- Dolor, inflamacion de cerebro, de corazon y de otros organos vitales:
- 2- Fiebre, y sintomas de alergias, de asthma y de gripa, de diabetes, de Autismo y de ADHD, de epilepsia, de reumatismo, de fatiga cronica, de Esclerosis Multiple, y de Fibromyalgia; problemas de Thyroides;
- 3- Derrames internos, y perdida de piel, y problemas estomacales, de equilibrio, de vista, de oido, de memoria, del habla, de concentracion y de respiracion.

Quimicos y otros toxicos que se encuentran en el interior de vehiculos, en el interior de edificios y otros lugares me causan algunos de estos efectos.

Los efectos causados por estos toxicos ambientales pueden ser inmediatos or retardados. Mi historia medica incluye inflamacion de corazon y de cerebro, inflamacion facial, y perdida de piel. Ver Pgs 3A, 3B.

Mi EHS y CHS han sido reconocidas como serias discapacidades medicas fisicas por agencias federales y estatales y tribunales. Ver pagina D.

+ (EHS es Electrohypersensitivity, y CHS es Chemical Hypersensitivity CHS)

No puedo estar en mi casa mas de unos minutos a la vez, y me quedo en un cuarto de metal y en otros lugares en el patio trasero. El dolor no se quita ni de dia ni de noche. He estado a punto de morir varias veces. A veces no puedo respirar ni con oxigeno. Esta es una forma horrible de morir.

Los sintomas de EHS and GHS SE PARECEN O SON IGUALES A SINTOMAS DE LA MAYORIA DE ENFERMEDADES, incluyendo enfermedades catastroficas, irreversibles y fatales. Se calcula QUE SIN SABERLO, mas de la mitad de niños y de adultos en los Estados Unidos (Mas de 160 millones), o uno de cada dos niños y uno de cada dos adultos tienen sintomas de EHS o de GHS. Ver pagina 1A, y paginas 3C y 3D.

La mayoria de escuelas de medicina no enseñan Medicina Ambiental, y LA MAYORIA DE MEDICOS NO SABEN O NO QUIEREN SABER DE EHS Y DE GHS. Ver paginas 3E - 3G, 7, 8.

El daño catasrofico, irreversible y fatal que esta siendo causado por estos ERRORES MEDICOS en millones de nuestros niños y en millones de otras victimas es detallado en la Petition to Impeach 3 Federal Judges (Aug. 2024) que ha sido presentada al diputado federal Jim Jordan, Chair of the U.S. House of Representatives, Judiciary Committee, and Exhibits A y B que se pueden ver en la seccion Case Law Documents of J. Mendoza en wirelesswatchblog.org +

+ <http://www.wirelesswatchblog.org/wp-content/uploads/2024/09/PetitiontoImpeach3FederalJudgesAug24.pdf>

Exhibit A: <http://www.wirelesswatchblog.org/wp-content/uploads/2024/09/StatementofPhysicalDisabilitiesExhibitApartone.pdf>

<http://www.wirelesswatchblog.org/wp-content/uploads/2024/09/StatementofPhysicalDisabilitiesExhibitAparttwo.pdf>

Exhibit B, Part one;

Exhibit B Part two;

y Exhibit B Part Three.

- A- EL REQUERIR que sus doctores, y enfermeras y escuelas de medicina TENGAN ENTRENAMIENTO EN MEDICINA AMBIENTAL;
- B- EL EXIGIR a sus Representantes y Senadores y a otras autoridades locales, estatales y federales que protejan a nuestros niños de estos errores medicos; (Estas autoridades han sido debidamente notificadas de estos errores medicos masivos y TIENEN EL DEBER DE VERIFICAR ESTA EVIDENCIA Y TIENEN EL DEBER DE PROTEGER NUESTROS NIÑOS DE ESTAS AGRECCIONES).
- C- Y EL COMPARTIR estos documentos (PARENTS ALERT Feb. 2025, en Español e Ingles) con su familia, pastores y contactos para que ellos hagan lo mismo:
- i- Puede evitar, parar y prevenir inmenso sufrimiento;
 - ii- Puede salvar la vida a millones de nuestros niños;
 - iii- Y puede restaurar nuestro sistema de salud AL INTENTO ORIGINAL.

NUESTROS NIÑOS NO SE PUEDEN DEFENDER DE ESTAS AGRECCIONES MEDICAS.

"A los menesterosos era padre,
"Y de la causa que no entendia me informaba con diligencia."
Job 29:16

"Rescata a los que van rumbo a la muerte;
deten a los que a tumbos avanzan al suplicio." Prov. 24:11 (NVI).

"¡Levanta la voz por los que no tienen voz;"
"¡Defiende los derechos de los desposeidos;" Prov. 31:8 (NVI).

Nuestras vidas no pertenecen solamente a nosotros. Nuestras vidas pertenecen a aquellos que nos necesitan desesperadamente. Elie Weisel.

No espere hasta que sea demasiado tarde. El ignorar los hechos no los cambia. Carleigh Cooper.

El silencio es el arma mas mortal de destruccion masiva.
Former U.S. Representative, Cynthia McKinney.

Estoy dispuesto a testificar BAJO PENA DE PERJURIO en cualquier tribunal (Por telefono cuando mi salud lo permita) de estas agrecciones contra nuestros niños.

Con el debido respeto, Jesus Mendoza 3 feb., 2025.
Jesus Mendoza

2202 E. 28th St. Mission, Texas 78574 Tel. (956) 583-7012.

EVIDENCIA MEDICA, CIENTIFICA Y LEGAL QUE HA COMPROBADO QUE SIN SABERLO, MILLIONES DE NIÑOS Y ADULTOS TIENEN SINTOMAS DE EHS, DE CHS Y DE OTRO DAÑO CAUSADO POR RADIACION MICRO-ONDAS Y QUIMICOS EN EL AMBIENTE.

El Summary de EHS por Dr. Erica Mallery-Blythe detalla como, SIN SABERLO, MILLIONES DE NIÑOS Y ADULTOS tienen sintomas de EHS y CHS. Pagina 1A.

El doctor William J. Rea, un experto en Medicina Ambiental y en EHS/CHS y reconocido mundialmente, detalla como la falta de entrenamiento en Medicina Ambiental esta causado errores medicos masivos. Paginas 3E - 3F.

Cuando era Director General de la Organizacion Mundial de la Salud, Dr. Gro Harlem Brundtland declaro publicamente que su EHS no es fantasia, y un Juez Aleman detalla las limitaciones causadas por su EHS. Paginas 4 - 6.

La doctora Elizabeth Evans detalla como la mayoria de los doctores no saben de EHS y recomienda quitar el Wi-Fi, telefonos celulares y otros inalambricos de casas con personas con enfermedades cronicas. Paginas 7,8.

Fotos detallan INFLAMACION causada por RADIACION INALAMBERICA Y DE MICRO-ONDAS, incluyendo inflamacion facial, perdida de piel, y como la inflamacion cerebral es tan intensa que esta afectando un ojo. Paginas 3A, 3B.

En el año 2003, un Juez del Seguro Social confirmo que mi EHS es una condicion medica fisica y seria. Pagina 9.

En el año 2007, una agencia estatal confirmo que mi EHS es una discapacidad medica fisica. Pagina 10.

En el año 2008, durante litigio estatal, dos Jueces confirmaron que mi EHS es una discapacidad fisica bajo la ley federal, incluyendo The Americans with Disabilities Act y the Rehabilitation Act. Paginas 11 - 14.

En el año 2018, durante litigio estatal, ~~el~~ ~~Estado de~~ ~~Texas~~ y un Juez reconocieron que mi EHS y CHS son discapacidades fisicas bajo ley federal. Paginas 15 - 22.

En el año 2018, dos Jueces del Seguro Social confirmaron que mi EHS es ~~una~~ condicion medica fisica seria; que el mejor tratamiento para EHS es evitar toda radiacion; y que EHS es reconocida por la comunidad medica. Paginas 23, 24.

En el año 2020 un Juez del Seguro Social confirmo que mi EHS y CHS son condiciones medicas fisicas y serias. Pagina 25.

En el año 2022, un Juez federal me dio una extension para entregar documentos debido a agravacion de mi EHS y CHS. Pagina 27.

En el año 2023, otro Juez federal me dio dos extensiones para entregar documentos debido a la agravacion de mi EHS y CHS.

Varias veces, expertos en Medicina Ambiental (En EHS y CHS) han confirmado mi salud mental. Paginas 1B - 1D, .2A, 2B.)

(La informacion medica que aqui se incluye no es confidencial y puede ser compartida)

Appendix 1. Electromagnetic hypersensitivity (EHS): excerpts from a summary by Dr Erica Mallery-Blythe⁸⁰

EHS is characterized by an awareness of/adverse response to even extremely weak electromagnetic fields (far below current safety levels) of varying frequencies, intensities and waveforms. It has been demonstrated to be an "environmentally inducible bona-fide neurological syndrome". It is a primary physical issue, not a psychological one. Conscious perception can vary with age, gender and physiology. Effects can occur even in those not experiencing symptoms at a cellular level, and it is possible that everybody could potentially develop EHS as every cell in our body is dependent on electrical signals.

Common symptoms: Headaches, dizziness, sleep disturbance, sensory up-regulation, dermatological issues, palpitations, visual/auditory disturbances, membrane sensitivity, muscle twitching, hyperactivity/fatigue, memory/concentration disturbance and anxiety (psychiatric symptoms such as anxiety and depression are likely to be secondary to the physiological effects rather than a primary cause).

Exposure-induced: EHS is a cumulative, exposure-triggered condition, and exposures are rising rapidly. If EHS is unmanaged and there is general deterioration, there will be reaction to an increasingly broad range of frequencies at increasingly low intensities. The number of devices triggering symptoms will increase, symptomatic distances will decrease and irreversibility will become more likely.

The number of people with EHS symptoms who have not yet linked them to exposure is likely to be far higher than the estimated 4–10% of the population reported by several countries. Given the ubiquity of exposure in all environments, it can be difficult for people to notice the association. Extrapolated figures suggest that 50% of the population may be affected by 2017. With enough exposure, it is possible that EHS could manifest in all members of the population. Many children are affected but undiagnosed. They are more likely to develop EHS since their exposure is higher and their systems are developing.

Socioeconomic impact of EHS and human rights: EHS is already affecting a very large number of people, many of whom are unable to work due to their condition, resulting in lost revenue. An extra burden is placed on healthcare agency resources due to inappropriate diagnosis and management of common symptoms. In more severe cases, individuals are forced to live in extreme isolation, poverty and poor health, with some living in cars and tents, which can also prove threatening to health and life, especially in extreme temperatures. They cannot access basic, life-sustaining public amenities, such as grocery stores and healthcare facilities, which constitutes a clear breach of their human rights.

"I have been contacted on a daily basis by individuals with EHS, medical practitioners, school and parent groups, legal representatives, the media and political bodies looking for medical advice on EHS or the health effects of EMF in general. This is an increasingly demanding task and therefore I have founded a medical organisation entitled PHIRE (Physicians' Health Initiative for Radiation and Environment) in to increase the available support for those requesting it" (<http://phiremedical.org/>).

RE: Jesus Mendoza

To Whom It May Concern:

The above patient has been under my care for many years. He is currently suffering from severe hypersensitivities to chemical fumes, odors, and a life-threatening electro-hypersensitivity. .

It is medically necessary that he be allowed to appear by phone for court. Please allow him to have phone conferencing as he is unable to tolerate the building. If this patient appears in person in court, his speech, concentration, memory, and hearing will be severely impaired. If he is confined inside a building or in other places where there is radiation, he could suffer irreversible harm including death.

Exposure to sources of radiation emitted by power lines, electric transformers and motors, computers, fluorescent lights, and wireless devices, causes Mr. Mendoza severe pain, swelling of vital organs, breathing difficulties; as well as speech, concentration, memory, and hearing deficits. Also, exposure to some chemicals, fumes, and odors can case the same health effects as listed.

If you have any questions regarding this please, please feel free to contact my office.

Sincerely Yours,

Alfred R. Johnson, D.O.

Re: Jesus Mendoza

To Whom It May Concern:

I have evaluated this patient's medical condition and it is important that the patient have a proper testing environment in order to attain maximum potential from this patient. The testing area should be devoid of any chemicals and any appliance that may emit electromagnetic fields that could significantly affect the outcome of this patient's tests.

If you have any questions, please do not hesitate to call my office at (214) 368-4132.

Sincerely,

William J. Rea, M.D., F.A.C.S., F.A.A.E.M.

Texas Rehabilitation Commission

RE: Jesus Mendoza
DOB:

To Whom It May Concern:

I saw Mr. Mendoza on a Texas Rehabilitation Commission evaluation request with this exam witnessed by my office secretary, and also with the patient's consent of the TRC office was present. This patient has stated that since late 1998 he has had a sensitivity to any type of electrical activity which includes any type of electric motor, radio, TV, computers, power lines or anything that has electrical activity to it. This has gotten worse with his having a headache each time he is exposed to some type of electrical activity with this a nonspecific type of headache without nausea or vomiting and no complaints of unilateral numbness nor weakness of the extremities and no complaints of any paresthesias nor numbness of any of the extremities. There is no dysarthria nor any true vertigo with this with his stating that once he is removed from any electrical activity then the headache will completely go away. He has taken over-the-counter medicines which have not helped the headache and has been on natural alternative medication which has not helped either.

This is a constant, daily problem and he states that he does not live in the house with his family but lives in a travel trailer next to his house with no electrical activity in the travel trailer. He also states that everyday he goes to a caliche pit in which there is no electrical activity and stays there for six hours and then that allows him to go back into town and allows him to be with the family for periods of time.

MCALLEN NORTH F.O.

Social history indicates he does not smoke nor drink socially.

Past medical history indicates he has not had any surgery, is not allergic to any medicines and not on any prescription medicines.

Review of systems has been negative.

The general exam reveals a gentleman about 5' 5" in height weighing 145 pounds on the scale in no distress. The lights on the exam room were not turned on but the door was open and through the hallway a light was shining into the exam room itself. There were no carotid nor cranial bruits and no pain on palpation of the scalp with both tympanic membranes normal. He has tense shoulder/cervical paraspinal muscles but the neck is supple.

The neurological exam on the mental status aspect is normal with his alert, conversing normally, following commands without any aphasia and very calm and cooperative.

Cranial nerves II-XII were intact with visual fields intact, pupils equal and reactive with sharp optic discs bilaterally and extraocular muscle movements intact without any nystagmus, dysarthria nor any facial weakness at all. Hearing is grossly intact with strength of sternocleidomastoid/trapezius muscles normal with tongue in the midline with full range of motion.

Sensory exam to light touch and painful stimulus as well as vibration/proprioception is intact of all extremities and of the face.

Motor exam reveals normal tone and strength of all the extremities with normal gait exam without any Romberg sign nor ataxia. He did not need any assistance nor devices to ambulate and could walk on his toes, heel and do tandem walking as well as bend over from a standing position and touch his toes quite easily. He has negative straight leg raising test bilaterally with rapid alternating movements of both hands, intact, able to pick up a paper clip and coin with either hand without any problems.

Reflexes are normal and symmetrical with downgoing toes bilaterally.

The patient has stated in the past he has worked as a mechanic and may have been exposed to toxic substances at that time but no other history of any exposure to toxic substances.

Review of the this patient's records indicate that he was evaluated by a Dr. William Rea in Dallas, Texas at the Environmental Health Center and was advised to avoid any appliances that emit electromagnetic field. He was seen on general medical evaluation by primary care physician, Dr.

Las fotos detallan la inflamacion facial causada por la radiacion emitida por la vocina del telefono alambrico despues de una audiencia por telefono en la Corte federal en McAllen. (Ahora uso telefonos especiales)

Durante mas de 3 años de litgio federal, oficiales escolares no negaron falsificacion de documentos, perjurio y otro fraude a la Corte para esconder que la radiation inalambrica y de micro-ondas en las escuelas esta mutilando, torturando y causando consecuencias fatales a millones de nuestros niños.

Mendoza v. Sharyland Ind. School District et al., Case No. 7:11-cv-29 (S.D. TX. 2011).

PARENTS ALERT (Feb. 2025).
ESPAÑOL

Evidencia en el record de Cortes federales y estatales ha comprobado el fraude en estos tribunales para esconder:

- 1- que los niveles de RADIACION MICRO-ONDAS en las escuelas es mas de docientos cincuenta mil micro-Watts por metro cuadrado, 250,000 uW/m2.
- 2- que esta radiacion ha causado daño fatal a maestros, bomberos y a policias y a otros ADULTOS;
- 3- que esta radiacion esta causando en millones de niños Sensibilidad a la Electricidad EHS, y daño al cerebro, a los ojos, a la sangre, al corazon, al sistema nervioso y al DNA;
- 4- que el bajar los standards academicos fue para esconder el daño cerebral causado por esta radiacion en millones de niños;
- 5- Para esconder que el cambio de Internet Alambrico a Internet Inalambrico en las escuelas no fue para mejorar la educacion, sino para enriquecer las compañías inalambricas, y farmaceuticas, y los carteles medicos.
- 6- que esta radiacion y errores masivos medicos estan mutilando, torturando y causando consecuencias fatales a millones de niños;
- 7- Y para esconder que bajo excusas de seguridad nacional fabricadas EL FUTURO DE NUESTROS NIÑOS ESTA SIENDO VENDIDO AL MEJOR POSTOR.

LOS NIVELES DE RADIACION MICRO-ONDAS EN LAS ESCUELAS ES MAS DE 250,000 uW/m2. Y estudios DE EXPERTOS MEDICOS/CIENFIFICOS DEMUESTRAN:

20 uW/m2	Altpeter 1995,1997 - <u>Problemas de sueño, de presion arterial, dolor, fatiga y problemas digestivos. Menos niños pasaron grado.</u>

Medical pioneer writes a history of environmental hypersensitivities

André Fauteux | 1 août 2016 | 0 Commentaires

Dr Rea founded the Dallas-based, Environmental Health Center in 1974.

Errors in diagnosis and treatment of diseases are common in physicians ignoring the principles of environmental medicine. They should be aware that various tests developed since the early 1980s "take the guess work out of the diagnosis" of chemical and electrical and electromagnetic hypersensitivity, writes Dr William J. Rea in a new paper published in Reviews on Environmental Health¹. A practising physician for 53 years, the American allergist, immunologist and thoracic surgeon has performed such tests on more than 30,000 patients in the last 35 years at the Environmental Health Center-Dallas (EHCD) he founded and still heads in Texas. These tests must be performed in controlled environments where the levels of biological, chemical and electromagnetic pollution has been reduced to a minimum using notably air filters, inert construction materials and copper shielding.

While food intolerance was first described by Hippocrates more than 2,000 years ago, microwave-illness (known today as electromagnetic hypersensitivity) was only first described in 1932 by Dr Erwin Schliephake who diagnosed patients overexposed to AM radiofrequencies; and American allergist Theron Randolph first described chemical hypersensitivity in 1962 based on tests performed in a controlled environment.

3 E

Dr Rea speaking in Brussels in 2015 at a conference on environmental sensitivities. Download slides at : http://appel-de-paris.com/?page_id=1667&lang=en (Click to enlarge)

Dr Rea's article explains principles such as total body pollutant load and masking of sensitivities by the general adaptation syndrome first described by University of Montreal endocrinologist Hans Selye, the first scientist to demonstrate the existence of biological stress. Biochemical individuality, the switch phenomenon (symptom variation), bipolar responses, spreading reactions to other organs, and nerve as well as head injury leading to hypersensitivity are the other principles discussed. Out of up to 3,000 psychological profiles performed by psychologists Butler and Didriksen at the University of North Texas on chemically sensitive patients, about "2,000 showed brain injury, not psychological conditions".

Buildings and rooms free of offgassing materials and electromagnetic fields (EMFs) are key to diagnosing and treating environmental hypersensitivities. "Clean living accounts for 60-75% of treatment", writes Dr Rea. At a conference on environmental hypersensitivities last year in Brussels, he once saw a patient return to the EHCD two decades after he had successfully treated her: "She got cocky and returned to her old toxic lifestyle."

Volatile solvent blood test results. (Click to enlarge)

He explains in the article abstract: "The clinician has to use less-polluted water and organic food with individual challenges for testing, including dust, mold, pesticide, natural gas, formaldehyde, particulates, and EMF testing, which needs to be performed in less-polluted copper-screened rooms. The challenge tests for proof of chemical sensitivity include inhaled toxics within a clean booth that is chemical- and particulate-free at ambient doses in parts per million (ppm) or parts per billion (ppb). Individual foods, both organic and commercial (that are contaminated with

Gro Harlem Brundtland, Director of World Health Organization: "Cell Phones, Computers Make Me Ill"

"It's not the sound, but the waves I react to. My hypersensitivity has gone so far that I even react to mobile phones closer to me than about four meters," says Gro Harlem Brundtland.

She is the Director-General of the World Health Organization (WHO), and she was talking to Aud Dalsegg, who interviewed her for the cover story of the Norwegian newspaper *Dagbladet* on March 9, 2002.

The former Prime Minister of Norway never owned a mobile phone herself, but she often received calls on her associates' phones. Now she says there is reason to be cautious about the technology.

"In the beginning I felt a local warmth around my ear," she told Dalsegg. "But the problem grew worse, and turned into a strong discomfort and headaches every time I used a mobile phone." At first she tried to avoid the pain by cutting her calls short, but this did not work. Nor was it sufficient to stop using the phones herself, because everyone around her, including at her workplace at the WHO in Geneva, uses them.

"I gradually understood that I had developed a sensi-

tivity to this type of radiation.

"And in order not to be suspected of being hysterical—that someone should believe that this was only something I imagined—I have made several tests: People have been in my office with their mobile phone hidden in their bag or pocket. Without my knowing whether it was off or on, we have tested my reactions. I have always reacted when the phone has been on—never when it is off. So there is no doubt."

As for wireless home phones, Brundtland said, "I get an instant reaction if I touch such a phone."

She also spoke about her reactions to computers:

"If I hold a laptop in order to read what is on the screen, it feels as if I get an electric shock up through my arms. So I must keep portable computers away from me. I have a regular desktop computer in my office, but only the secretary uses it. I have not noticed the same symptoms near it, but I turn it off as soon as I come in."

The headaches she gets from mobile phone radiation subside about a half hour to an hour after the exposure stops, she said.

A medical doctor and master of public health, Brundtland gained international recognition in the 1980s for championing the principle of sustainable development as chair of the World Commission on Environment and Development (the Brundtland Commission). In October 1996 she stepped down as Prime Minister of Norway, after being head of her government for more than ten years. She has headed the World Health Organization since July 12, 1998.

Brundtland was careful, in the interview, to say that the danger from mobile phones has not been scientifically proven: "We do not at present have enough scientific evi-

Ex-WHO General-Director and Ex-Prime Minister of Norway Wireless Technology Has Negative Health Effects. There Is No Doubt.

On Friday the 14th of August 2015, retired WHO General-Director and Prime Minister of Norway, Dr. Gro Harlem Brundtland, was interviewed by the Norwegian newspaper Aftenposten (<http://www.aftenposten.no/nyheter/iriks/Brundtland--Min-kropp-har-reagert-pa-mobilstraling-i-25-ar-8125147.html>). One of the issues raised in the interview was her current thoughts on wireless radiation. Her statement was crystal clear. Above is the relevant clip from the interview, subtitled in English by Citizens' Radiation Protection, Norway. We are grateful to Gro, for her clear and honest response.

German judge is electrosensitive, seeks refuge in EMF-White Zone

An electrosensitive judge from Augsburg finds refuge in the Wehra Valley (German Black Forest).

An electrosensitive (EHS) judge from Augsburg finds refuge in the Wehra Valley (German Black Forest)

Rain splattered on the roof of the little white camper. Although Barbara has turned up the heater, the cold of winter creeps along the ground and relentlessly wraps around our feet. Barbara Domberger is on a forced vacation in Wehra Valley. The rugged gorge is one of the few havens left for the electrosensitive.

She recalls she once still had a few secluded holiday areas where she could retire, but gradually, they have disappeared. "The digital network is currently our biggest problem," she says. The 43-year-old District Judge is on the run - from harmful emitters, mostly microwaves from mobile phone networks. "I've become electrosensitive," she says.

The judge is convinced: when she's exposed to artificial electromagnetic fields for too long, like those from cordless phones or wireless Internet connections, she gets sick. She feels artificially invaded, unable to sleep and concentrate. "And all my muscles harden." Her family doctor says it's from too much stress.

It took three or four years of suffering before an old school friend put her on the right track, says Domberger. Back then the concept of electrical sensitivity was unknown. That's changed: Domberger has read many studies on her condition and has developed contacts with people who share her plight. She chairs the Munich Society for the electrosensitive and mobile-phone injured.

Barbara Domberger in his camper

She is very convincing when she easily refutes the arguments of the mobile phone industry. She knows that many prefer sticking her with a psychosomatic label. If that was the case, then how can one explain that her heart rate changes as soon as she enters a room filled with radiation? Domberger says it's a clear medical evidence.

Fear of radiation dominates her life. The once-successful young woman had to abandon her condominium with 17 a square-meter rooftop terrace near downtown Augsburg. "The apartment couldn't be shielded," she says. Her furniture is stored. She's looking for a small apartment in low-radiation area, which she could shield with special reflective paint.

She only goes out when necessary. For shopping, of course. But a movie or the theater? "I used to like going to restaurants," says Domberger. Today, she even turns down birthday invitations, because almost everyone has a cordless phone at home. "I miss the contact with ordinary people," she says with a sigh.

Since January 2010, the District Judge is on sick leave. The state of Bavaria is considering putting her on permanent disability.

Barbara Domberger was in charge of the elderly and disabled. She'd love to work again. "Being a judge was my dream job." For eight years, she worked at the District Court of Augsburg, and before that six years as a prosecutor, also for the Federal Ministry of Justice. Now she's fighting for electrosensitivity to be recognized as a disease and to obtain help for those affected.

Today she's resting in the Wehra Valley. "Here I feel really good, as I did before," she says with a smile.

Very little radiation gets through where she parked her white camper, as opposed to airports or railway stations. A holiday trip in the hot South? Only by car. For longer trips, she bought a special blouse, woven with reflective silver fiber. It cost her 90 Euros. "Most people with EHS can't afford it," says Domberger who asked us not to divulge the exact location of her retreat.

ELECTROSMOG DOCTOR

The doctor who diagnosed her own electrosensitivity

GP Dr Elizabeth Evans turned her health around after discovering she was sensitive to electrosmog. Here's her story, as told to Guy Hudson, and what you can do to treat electrosensitivity

I had just had my fourth child, and already had three other children aged under six, when I started to notice that I couldn't sleep, felt 'wired', and was becoming more and more anxious.

After 12 weeks, when the baby started sleeping through the night, I continued to have problems sleeping. We then moved to rented accommodation and my symptoms got worse. That first night I could not get to sleep. Eventually I slept for about two hours and, when I awoke, I had a racing heart. It felt like an anxiety attack but in my body, not my head.

Over the next few weeks, I became increasingly bad-tempered and irritable. I noticed I was forgetting words when talking on the cordless phone and, when sitting next to our router, I felt a pressure sensation in my head and ear. For the first two weeks our landline wasn't connected, so I had to use my mobile a lot; my laptop also had a 3G dongle.

I was getting headaches and felt pressure in my head whenever I used a cordless phone, and if someone was using a mobile nearby in the playground, I would feel pain in the muscles across my back. But whenever I went for a walk in the middle of the countryside, I began to feel normal again.

Something in the air

Eventually I realized that something in my environment was causing these symptoms and began to work it out: we had a new digital baby monitor and a new Wi-Fi router directly below our bed. I was using a mobile-phone dongle on my laptop and our rented house was in direct view of a mobile-phone mast. By then I was severely incapacitated. I was sensitive to the electrosmog in town and became almost housebound trying to

Once we'd got rid of the Wi-Fi router and thrown away the baby monitor, my symptoms started to improve

avoid wireless radiation. Luckily I was able to identify the problem because the time between my symptoms easing or going away and any reduced exposure to electrosmog was short. It's far more difficult to identify electrosmog as the trigger if your symptoms take a long time to appear. Soon I was able to really see which signals were causing the problem.

I suspect I was slightly electrosensitive before the symptoms really hit me; I had always resisted Wi-Fi and didn't like using my mobile phone.

After my fourth pregnancy and

breastfeeding, I was clearly run down and susceptible, and the massive increase in my exposure to wireless radiation coinciding at this time was the likely cause of my dramatic symptoms. I couldn't go to other people's homes; I couldn't even be in our living room because of the neighbour's Wi-Fi. Some areas of the house made me feel particularly unwell whereas other places, like the hall, were fine and I naturally gravitated to them. Subsequently we were able to confirm that microwave levels were lower in these neutral areas.

Detective work

Once I suspected I was sensitive to electrosmog, I began searching on the internet to find out more about electrosensitivity and its symptoms—which range from headaches, heart arrhythmias, depression and mood swings to lack of concentration, allergies and even tinnitus.

We also immediately got rid of the Wi-Fi router and got a wired router instead and, after throwing away the baby monitor, my symptoms started to improve. We then had an electromagnetic survey done and got advice on how to further avoid ambient microwaves. I avoided hotspots and also tried various forms of shielding. I bought specially designed clothes from the US made from materials that block radiation, which helped me on the school run. Next we concentrated on the bedroom, where we installed a bed net and put shielding material over the

Once I started sleeping better, my health and tolerance of wireless radiation outside the home began to improve

windows; if you create a radiation-free sleeping environment, you have the best chances of healing.

Like many electrosensitive people, I had had a previous environmental condition—in my case, two years of myalgic encephalomyelitis/chronic fatigue syndrome (ME/CFS) in the 1990s—from which I fully recovered by addressing adrenal fatigue through a combination of nutritional therapy, homeopathy, acupuncture and osteopathy.

That experience made me realize that the body has an amazing power to heal itself when given the right support and nourishment; it also gave me an interest in the various complementary treatments available.

I joined the British Society of Ecological Medicine in 1999 and attended several of their teaching modules on allergies and environmental and nutritional medicine over the last few years. With my four children, I have learned a lot about the natural approach to health by treating their various illnesses and health complaints.

Once I started sleeping better, my

health and tolerance of wireless radiation outside the home began to improve. I then began an intensive nutritional/supplement programme to support my adrenal glands. This often consists of boosting key hormones like cortisol, insulin and aldosterone by eating lots of eggs, dairy, nuts and seeds, and good fats like butter and coconut oil, while avoiding sugar (including from too much fruit) and refined carbs like white bread and rice.

The final piece of the puzzle Supplementing with B-complex vitamins, and *Chlorella* and wild yam can also help. I also found that Nambudripad's Allergy Elimination Techniques (NAET)—an East-meets-West blend of non-invasive healing practices like spine manipulation and acupressure/acupuncture to clear away

What is NAET?

NAET (pronounced 'nate') stands for Nambudripad's Allergy Elimination Techniques and was developed by Devi Nambudripad, a chiropractor and acupuncturist based in California. The drug-free system uses kinesiology to diagnose, and acupressure/acupuncture to treat, allergic-type responses. NAET defines an allergy as a negative reaction to any agent that for most people would be neutral or even beneficial; it's a technique that can help with most conditions, not just the usual food allergies and hay fever.

NAET seeks to reduce allergic reactions and sensitivities by balancing and unblocking *qi* (chi) energy to help the body heal itself, using a blend of techniques like acupuncture/acupressure, chiropractic, nutrition and kinesiology. One allergen is treated at a time; it may take several visits to desensitize a severe allergen. Beginning in 1983, over 12,000 practitioners all over the world have been trained by Dr Nambudripad.

or chronic illness to clear their home of all wireless and other electromagnetic-field-generating devices. They can stress out your system, which reduces your ability to heal.

One reason why conventional doctors generally overlook the possibility of electrosensitivity when diagnosing their patients' complaints is that they usually confine their questions to their patients' symptoms, not their environment. They are not trained to ask about the presence of baby monitors, Wi-Fi and cordless phones, and the use of mobiles, and they never visit their patients' homes.

Without this line of questioning, it's virtually impossible to identify whether a patient is electrosensitive.

And as the idea of electrosensitivity is not taught in medical school, unfortunately most doctors are unaware of it.

Physicist Guy Hudson is an electromagnetic surveyor who helps consumers lower their exposure to excessive radiation and protect themselves from electrosensitivity, particularly to dirty electricity. See www.ben-go.co.uk and www.es-uk.org for more information.

All about Dr Liz

Elizabeth now leads a very full life as the mother of four children and as a NAET practitioner working with patients who have a wide range of conditions, including environmental allergies, chronic fatigue and electrosensitivity. She has also cofounded Stop Smart Meters (UK) (www.stopsmartmeters.org.uk), an organization with links to other Stop Smart Meters movements worldwide. This campaigning group aims to stop the use of meters that monitor, measure and communicate your gas, electricity and water usages to utility providers wirelessly through constant bursts of microwaves, 24/7.

In this role, she gave evidence last year to the House of Commons Select Committee overseeing the UK Smart Meters rollout on the adverse health effects of wireless radiation. She is also medical advisor to the Safe Schools Information Technology Alliance (SSITA; www.ssita.org.uk), which campaigns against Wi-Fi and mobile phones in schools to protect children from the adverse effects of wireless radiation, and has given lectures on these topics on several occasions. She can be contacted on lizfinch@hotmail.com. Other British GPs who recognize and treat electrosensitivity include Dr Erica Mallen-Blythe (based in the US) and Somerset-based Dr Andrew Tresidder.

allergies and sensitivities of all sorts (see box, top right)—speeded up my recovery considerably. The final piece of the healing jigsaw was moving to our currently electrosmog-free home.

Since then, I have trained as an NAET practitioner, as I was very excited by the dramatic effect it had on my health. Most NAET practitioners in the US are qualified medical doctors, often allergy specialists whereas, in the UK, most are complementary practitioners.

I would advise anyone with an environmental

DECISION

IN THE CASE OF

CLAIM FOR

Jesus Méndez
(Claimant)

Period of Disability,
Disability Insurance Benefits, and
Supplemental Security Income

FINDINGS

After careful consideration of the entire record, the Administrative Law Judge makes the following findings:

2. The claimant has not engaged in substantial gainful activity since August 31, 2000, although he continues to engage in work activity.
3. The claimant's electromagnetic sensitivity is a severe impairment, based upon the requirements in the Regulations (20 CFR §§ 404.1521 and 416.921).

The following medical information is needed to determine this patient's eligibility for the In-Home and Family Support Program. The Program is intended to assist families in maintaining an individual with a physical disability IN THE HOME. PLEASE COMPLETE ALL ITEMS BELOW. If you have questions, please contact the caseworker at the address and phone number above.

I. MEDICAL DIAGNOSIS: Highly sensitive to electricity

II. APPROXIMATE DATE OF ONSET OF DISABLING CONDITION: 1997

III. FUNCTIONAL LIMITATIONS (check all SUBSTANTIAL limitations that apply): When exposed

<input type="checkbox"/> Self-Care	<input type="checkbox"/> Self-Direction
<input checked="" type="checkbox"/> Receptive and Expressive Language	<input checked="" type="checkbox"/> Capacity for Independent Living - <u>Yes, when in crisis</u>
<input checked="" type="checkbox"/> Learning <u>+L Severe</u>	<input checked="" type="checkbox"/> Economic Self-Sufficiency - <u>Self employed needs to avoid exposure to</u>
<input checked="" type="checkbox"/> Mobility <u>- Severe</u>	<input type="checkbox"/> Other (specify): <u>remain able to work.</u>

IV. EXPECTED DURATION OF DISABILITY: Unknown

V. PROGNOSIS: - poor

VI. RECOMMENDATIONS/OTHER COMMENTS: Do you recommend a monitor to measure radiation around client's Environment? Yes No

These will greatly enhance his ability to prevent exposure increasing quality of life + make him able to work at home.

CAUSE No C-013-08-I
THE STATE OF TEXAS

In Re, Jesus Mendoza

IN THE DISTRICT COURT
OF HIDALGO, TEXAS,
197th JUDICIAL DISTRICT
398th

Honorable Migdalia Lopez
District Judge

**PETITIONER'S MOTION TO APPEAR BY TELEPHONIC
CONFERENCE TO JUDICIAL PROCEEDINGS**

Now Comes Pro-se Petitioner and respectfully requests this Court leave to appear by telephonic conference to hearings, depositions, trial and other judicial proceedings before this Court as a reasonable accommodation to Petitioner's disability.

1. Petitioner, Jesus Mendoza, suffers of a severe medically recognized disability that impairs among other things his ability to stay inside buildings for extended periods of time. Exposure to radiation emitted by power lines, fluorescent lights, video display terminals, air-conditioning motors, cellular telephones, etc., causes Petitioner among other things swelling of vital organs, internal bleeding, breathing problems, loss of concentration and speech impairment. Petitioner's ability to work, has been substantially impaired. Petitioner has been violently ill several times, Petitioner is in pain all the time. Please See Statement of Disability and Decision of the Social Security Administration finding Petitioner's electromagnetic sensitivity a severe impairment, and a photo showing the swelling on Petitioner's face. Please See Exhibits "1", "2", and "3".

Petitioner has filed in this Court a Petition to remove from the bench Justice of the Peace Ismael "Melo" Ochoa on the ground that Judge Ochoa has engaged in:

||

judicial misconduct. Petitioner requires accommodations to his disability during discovery and prosecution of the Petition, to prevent further aggravation of Petitioner's health condition and to prevent that others may take advantage of Petitioner's disability.

ARGUMENT

Appearing by telephonic conference to hearings, depositions, and other judicial proceedings before this Court is a reasonable accommodation to Petitioner's disability. The American with Disabilities Act and Section 504 of the Rehabilitation Act, require that the courts provide reasonable accommodations to the disabled on judicial proceedings. Accommodations to Petitioner's disability during judicial proceedings are necessary to provide Petitioner access to the courts and due process. The due process right of access to the courts, and the right to petition the government with grievances applies to persons in extraordinary circumstances. *In Re Primus*, 436 US 412, 98 S Ct. 1893, (1978), *Bounds v Smith*, 430 US 817, 97 S Ct. 1491 (1977).

RELIEF

For all of the above reasons, Petitioner respectfully requests this Court to set hearing on this matter by telephonic conference at the Court's earliest convenience and that upon hearing, the Court grants Petitioner's Motion for Special accommodations to Petitioner's disability during judicial proceedings, including appearing by telephone to hearings, depositions, trial, and other judicial proceedings, and provide Petitioner any appropriate remedy at law or in equity that Petitioner is entitled. Respectfully submitted,

Jesus Mendoza, Pro-se Petitioner 2202 E. 28th Street, Mission, Texas 78174,

PRO-SE RESPONDENT COUNTER-PETITIONER MOTION TO APPEAR BY PHONE TO COURT.

EXPEDITED CONSIDERATION REQUESTED.

I respectfully request the Court to allow me appearing by phone to the hearing set in this Court for July 26, 2017 at 9:00 am and to any other hearings before this Court on the ground that a life-threatening disability does not permit that I appear in person to Court; on the ground that the State of Texas and the Texas Attorney General have admitted to this Court the legitimacy of my life-threatening disability; on the ground that the U.S. Supreme Court in Tennessee v. Lane 541 U.S. 509 (2004) required that State Courts provides reasonable accommodations to persons with disabilities to access and petition the Courts; and on the ground that allowing me to appear by phone is a reasonable accommodation to comply with the 13th. Court of Appeals Order dated June 30, 2017 to have a hearing pursuant to Tex. R. App. P. 34.6(f)(4), and 37.3(a)(1) as explained herein.

15

76

DECLARATION

1. My name is Jesus Mendoza, my date of birth _____ and my address is 2202 E. 28th St. Mission, Texas 78574.
2. I declare under penalty of perjury that I am of sound mind and competent to make this Declaration and that the facts stated in this Declaration are within my personal knowledge and are true and correct.
3. I am suffering of a painful, debilitating, and life-threatening Electro-hypersensitivity and of chemical sensitivity.
4. Exposure to the radiation found inside buildings, including the radiation emitted by power lines, electric transformers and motors, fluorescent lights, Wi-Fi transmitters, cell phones, and wireless computers causes me among other things, swelling of vital organs, swelling of face, head and eyes, flu and allergy symptoms, rashes and loss of skin, symptoms of heart attack and of stroke, and breathing, speech, hearing, concentration and memory problems. Exposure to the chemicals found inside buildings causes me some of the same health problems.
5. The delayed effects of radiation exposures have been catastrophic. I have a history of life-threatening swelling of heart, and the swelling inside my skull has been so severe as to push an eye out

16

of its socket.

6. I cannot be inside my home but for a few minutes at a time, and I stay in a metal room and in an underground room in the backyard. with exception of some walks around the neighborhood during the year 2011 and walks to the neighbors, I have been home bound for more than 6 years.
7. I have been violently ill several times. At times, I struggle to breathe even with oxygen. I am in pain all the time. Everyday is different nightmare.
8. My Electrohypersensitivity has been recognized as a physical medical condition and as a disability by federal and State agencies and by Courts.
9. On November 8, 2016, on a hearing before this Court on the State of Texas' Motion to enforce by incarceration alleged support orders, in which I was allowed to appear by phone, my Court appointed attorney, Ms. Teresa Coronafo read to the Court my doctor's letter which states that it is medically necessary that I be allowed to appear by phone to Court and details how my life-threatening Electrohypersensitivity and my chemical sensitivity do not permit that I appear in person to Court and stating that if I am confined inside a building or in other places where there is radiation, I could suffer irreversible harm,

including death. A copy of my doctor's letter is attached as Exhibit A.

10. In response, the State of Texas, through the Defendant the Texas Attorney General, Ken Paxton, allowed my doctor's letter into evidence and withdrew his motion to enforce by incarceration the alleged support orders, admitting to the legitimacy of my Electro-hypersensitivity and chemical sensitivity as physical medical conditions and as disabilities; admitting to my inability to appear in person to Court; and admitting to the seriousness of my health condition.

11. At no time, the State of Texas nor Defendant Paxton have opposed my Motions to appear by phone to judicial proceedings.

12. For all these reasons, I respectfully request the Court to allow me appearing by phone to judicial proceedings.

Respectfully submitted,

Jesus Mendoza 24 July, 2017.

JOHNSON MEDICAL ASSOCIATES

Comprehensive Medicine | Traditional | Holistic | Alternative

October 28, 2016

RE: Jesus Mendoza

To Whom It May Concern:

The above patient has been under my care for many years. He is currently suffering from severe hypersensitivities to chemical fumes, odors, and a life-threatening electro-hypersensitivity.

It is medically necessary that he be allowed to appear by phone for court. Please allow him to have phone conferencing as he is unable to tolerate the building. If this patient appears in person in court, his speech, concentration, memory, and hearing will be severely impaired. If he is confined inside a building or in other places where there is radiation, he could suffer irreversible harm including death.

Exposure to sources of radiation emitted by power lines, electric transformers and motors, computers, fluorescent lights, and wireless devices, causes Mr. Mendoza severe pain, swelling of vital organs, breathing difficulties, as well as speech, concentration, memory, and hearing deficits. Also, exposure to some chemicals, fumes, and odors can cause the same health effects as listed.

If you have any questions regarding this please, please feel free to contact my office.

Sincerely Yours

Alfred R. Johnson, D.O.

SOCIAL SECURITY ADMINISTRATION
OFFICE OF DISABILITY ADJUDICATION AND REVIEW

ORDER OF APPEALS COUNCIL

REMANDING CASE TO ADMINISTRATIVE LAW JUDGE

In the case of

Claim for

Jesus M Mendoza
(Claimant)

Supplemental Security Income

(Wage Earner) (Leave Blank if same as above)

(Social Security Number)

The Administrative Law Judge issued a decision on April 4, 2017. The claimant has asked the Appeals Council to review this decision.

The Appeals Council grants the request for review under the substantial evidence provision of the Social Security Administration regulations (20 CFR 416.1470). Under the authority of 20 CFR 416.1477, the Appeals Council vacates the hearing decision and remands this case to an Administrative Law Judge for resolution of the following issue:

- The decision finds the claimant does not have a medically determinable impairment, in part, because his diagnosis of electro-sensitivity disorder is not recognized by the medical community. The claimant's doctor diagnosed this impairment and submitted evidence of signs, symptoms and laboratory testing (Exhibits 3F, 4F, 5F and 6F). In October 2014, the claimant's doctor noted he has been homebound for three years and has many symptoms from electric field exposure including systemic problems and skin reactions with blood pressure variations (Exhibit 3F, page 2). In May 2015, the claimant's doctor indicated the best treatment for the claimant's condition is to avoid all radiation, which causes him to be homebound. At the same time, the claimant was prescribed portable oxygen due to difficulties with breathing related to his impairment (Exhibits 4F and 5F). Laboratory testing from 2008 indicates abnormalities in auto immune functioning (Exhibit 6F, pages 63-66). The claimant submitted laboratory tests from 2013, which may also show additional abnormalities (Claimant Submitted Evidence pages 116-117). Further, consultative examiner Dona E. Cooper-Dockery, M.D. indicated that, while rare, the condition is recognized in the medical community (Exhibit 1F, page 8). Finally, the State agency consultants did not have the full record when determining there was insufficient evidence to find a medically determinable impairment. As such, further consideration of whether the claimant has signs, symptoms and laboratory testing to confirm a medically determinable impairment based on his electro-sensitivity disorder is needed.

See Next Page

Jesus M Mendoza (

Page 2 of 2

Upon remand the Administrative Law Judge will:

- Obtain evidence from a medical expert to determine whether claimant has a medically determinable impairment consistent with Social Security Ruling 96-4p and, if so, the nature and severity of and functional limitations resulting from the claimant's impairment (20 CFR 416.913a(b)(2)).

In compliance with the above, the Administrative Law Judge will offer the claimant an opportunity for a hearing, address the evidence which was submitted with the request for review, take any further action needed to complete the administrative record and issue a new decision.

DECISION

IN THE CASE OF

CLAIM FOR

Jesus M Mendoza
(Claimant)

Supplemental Security Income

The claimant's ability to perform work at all exertional levels has been compromised by nonexertional limitations. In his pre-hearing filings, the claimant alleged that he has a sensitivity to electro-magnetic fields. 3E/2. He asserted that he has life-threatening "Multiple Chemical Sensitivity" (MCS) and "Electrohyper-sensitivity" (CHS). 14E/1; 23E/1. He alleged that exposure to radiation emitted by power lines, electric transformers and motors, fluorescent lights, video display screens, cell phones, wireless computers, aircraft and vehicle radar, dirty electricity etc, causes various symptoms, including: swelling of vital organs, swelling of his face, head and eyes, symptoms of heart attack and of stroke, flu and allergy symptoms, inability to sleep, rashes and loss of skin, and breathing, speech, vision, memory and concentration problems. 14E/1; 2F. He asserted that exposure to chemicals and odors found inside buildings and vehicles have similar effects. 14E/1. He claimed that he has passed out from pain and the inability to breathe on several occasions. 23E/3. He asserted that he cannot drive. 14E/1. The claimant also asserted that he cannot walk farther than the next-door neighbors' house. 14E/1. He alleged that he cannot stay in his home for more than a few minutes, so he spends his days in his yard. 14E/1. He claimed that he wears protective gear on his "thoracic box" and head.

FINDINGS OF FACT AND CONCLUSIONS OF LAW

After careful consideration of the entire record, the undersigned makes the following findings:

1. The claimant has not engaged in substantial gainful activity since October 2, 2014, the application date (20 CFR 416.971 *et seq.*).

The claimant worked after the application date but this work activity did not rise to the level of substantial gainful activity. The claimant's earnings records show \$957.00 earned in 2015. This is below substantial gainful activity levels. 21D.

2. The claimant has the following severe impairment: immunodeficiency (20 CFR 416.920(c)).

The above medically determinable impairments significantly limit the ability to perform basic work activities as required by SSR 85-28.

CIVIL ACTION NO. 7:22-CV-85

ORDER

Pending before the Court is Plaintiff's "Motion for Enlargement of Time." (Docket No. 48.) The Motion requested that the Court grant an extension of time "until December 15, 2022[,] to file a response to the Court Order dated September 15, 2022, Docket [No.] 47."¹ (*Id.* at 2.) Plaintiff argues that an extension is necessary due to his "debilitating health conditions." (*Id.*) Defendant has not yet responded to the pending motion. In any event, the undersigned finds that Plaintiff should be allowed an extension of time.

Accordingly, it is hereby **ORDERED** that Plaintiff's "Motion for Enlargement of Time" (Docket No. 48) is hereby **GRANTED** in part. Plaintiff's response to the Court's Order (Docket No. 47) is due on October 31, 2022. Furthermore, Defendant shall file its response within thirty (30) days of the filing by Plaintiff.

The Clerk shall provide copies of this Order to Plaintiff and counsel for Defendant.

SO ORDERED, the 18th of October, 2022 at McAllen, Texas.

NADIA S. MEDRANO
United States Magistrate Judge

26

¹ The undersigned notes that the deadline for Plaintiff's response to the Court's Order (Docket No. 47) expired on October 17, 2022.
